

# Living Pain Free

## Back Pain Technology Update

### **Here Is Your Chance To Say Good-bye To Your Chronic Neck and Lower Back Pain!**

Millions of people every year are affected by serious neck and lower pain due to a bulging, herniated or degenerative disc and think that the only way to stop it is with pain medication or surgery. Well, now there's a safe, drugless alternative that is more effective, and costs less rendering results in a matter of weeks! So if you're scared of risky back surgery and are tired of popping pills, keep reading as I share with you.

## *DRX9000C™ Spinal Decompression Therapy...* **The Real Back Pain Solution**

*Inside This Special Report I Will Share With You How An Amazing Non-Surgical, FDA Approved Technology Discovered By NASA Over 10 Years Ago During Space Travel Is Now Helping Back Pain Sufferers All Over The World Eliminate Their Herniated and Bulging Disc Pain With An Astounding 86% Success Rate!*

### Inside You Will Discover:

- ✓ **HOW NON-SURGICAL DRX9000C™ THERAPY RIVALS THE RESULTS OF NECK & BACK SURGERY:** Approved by the Food & Drug Administration, the DRX9000C™ is the missing link for chronic back pain sufferers with an incredible, 86% success rate in clinical trials and no documented side effects! Considering the United States Department of Health & Human Services has reported that back surgery is helpful only in a shocking 1% of cases... I think your odds are fantastic!
- ✓ **WHY MEDICALLY PROVEN DRX9000C™ TECHNOLOGY IS SO GOOD IT'S PATENTED:** Don't confuse DRX9000C™ with "traction" machines, which competitors are fraudulently advertising as "spinal decompression." Traction is as "old as the hills" and does NOT decompress the disc. The U.S. Government is issuing a 50-page patent to stop owners and manufacturers of cheap "knock offs" on the DRX9000C™ (which cost about \$90,000 less) from claiming their machines do what the DRX9000C™ does!
- ✓ **WHY PROFESSIONAL ATHLETES AND TV PERSONALITIES RAVE ABOUT THE DRX9000™:** Once you experience the DRX9000C™ treatments yourself, you'll understand why pro athletes, including PGA golfers, pro football players and TV personalities rave about this... instead of drugs or surgery. Plus, the DRX9000C™ can be completed in just a few weeks—it's not an ongoing process, nor is it a short-term fix!
- ✓ **And More**

# How Serious Back & Neck Pain Can Be Relieved Through Breakthrough Medical Technology!

Dear Back Pain Sufferer,

If you have lower back pain... or sciatica... due to a bulging, herniated or degenerative disc...

## **This Is Going To Be The Most Important Message You Will Ever Read!**

Here's why:

As you probably know, tens of millions of Americans experience problems with our lower back. In fact, 80-90% of all adults will suffer lower back pain some time in their life. It's the leading cause of disability for people under 45 years old. This prompts many people to rush right into back surgery so they can get out of pain as soon as possible. Others believe the largely accepted myth that back pain usually goes away all by itself, without any treatment. Most doctors believe the claim that 90% of episodes of low back pain will resolve within one month. But a study published in the *British Medical Journal* proved this myth totally untrue. It revealed that 12 months after patients' initial medical consultation that there condition was either pain and/or disability in 75% of cases studied!

The truth is, if you live long enough, I can almost guarantee you will have back pain due to spinal disc degeneration. It's an extremely common and perhaps in some ways, natural condition that affects almost everybody at some point in their later life... some earlier.

Consider the shocking fact that lower back pain is the second leading cause of visits to doctors' offices and the third leading reason for hospital admission in the United States alone. Many of these people have surgery. Surgery performed by doctors before ever considering any other options. This has led to some alarming stories on how some of these operations have gone wrong for some patients.

## **The U.S. Department of Health and Human Services Has Reported Back Surgery To Be Helpful In Only a Shocking 1 out of every 100 Cases!**

Scary but true!

But don't worry, what I have to tell you today is not going to be another story about some new type of surgery technique from Europe...not at all!

What I am going to share with you is an alternative to surgery called the *DRX9000C™ Non-Surgical Spinal Decompression* - an FDA approved non-invasive back pain SOLUTION which has a remarkable 86% success rate with serious back and neck pain patients suffering from herniated or bulging discs, arthritis and sciatica. In fact, even the most debilitating back conditions show improvement after just the first few minutes on the machine! So keep reading now and learn more about what some are calling the most promising back pain treatment today!

But first...

## **Allow Me To Now Introduce Myself.**

My name is Dr. Bob Patterson, and I am a physician practicing right here in town. My office is located at Covenant Clinics. In fact, my office is probably just a short walk or ride from your home.

In addition to general medicine, I also have a sub-specialty in non-surgical pain management techniques including *DRX9000C™ Non-Surgical Spinal Decompression* that has already liberated lower back pain and sciatica sufferers from a “life-sentence” of pain... in a matter of a few short weeks – without drugs... without surgery... without long-term ongoing treatment! Even with multiple herniated discs... bulging discs and degenerated discs!

## **Everywhere People Are Raving About the Amazing DRX9000™!**

Most doctors realize that determining if a procedure is appropriate and safe for a patient is the number one concern when performing a procedure. But it’s sad but true, as patients say, that many surgeons will do back surgery on anyone who shows up with MRI findings of a disc problem.

Maybe *you* have been to a doctor who took one quick look and told you that you need surgery, and that it’s your “only option.”

Not me.

You see, in my opinion, too many back surgeries are being performed, with less than perfect results all over the country.

The research clearly shows that non-surgical DRX9000C™ spinal decompression works so well, that it ought to be considered first. The problem is, only a handful of doctors around the country are willing to purchase a DRX9000C™.

I’m proud to say that I offer my patients the back pain and sciatica technology that most doctors are just not willing to provide. And that’s why I have the capability to solve cases of chronic lower back pain after many doctors have failed.

Sure I feel I’m a bright and capable doctor. But I must tell you that the secret to my success has been my willingness to invest the time, effort and money into the best technology available, so my patients could get the best results possible.

## **The Best Non-Surgical Treatment In The World?**

Through my research, I’m quite certain I’ve made available to you, the best back pain relief technology on the market – FDA-approved technology proven successful on nearly 9 out of 10 cases!

The much overused terms, “state-of-the-art” and “cutting edge” technology are, in the case of the DRX9000C™, quite accurate! For years, I’ve built my practice by getting results... after all else had failed.

I’m a stickler for maintaining an enjoyable treatment experience from start to finish.

I believe that all patients deserve “red carpet treatment” – and I go to great lengths to provide it, while my patients enjoy a speedy recovery. I perform DRX9000C™ treatment right on site at my beautiful facility, right here in town.

But what about the DRX9000C™ procedure itself?

Well, in the past, if you had a herniated disc, the *only* treatment option you got was surgery – the removal of the herniated or bulging disc material... or the *entire disc!*

You could be left without any disc at all to cushion the normal wear and tear and shock of daily movement. In other words, the injured disc didn't actually heal. Just the part that was pinching the nerve was cut out.

But now, as the result of an accidental discovery made by NASA scientists several years ago, the most impressive and effective new back pain relief technology has been invented.

This computerized DRX9000C™ machine is so fantastic; it can actually get your bulging or herniated disc material, which is causing your pain to go back where it belongs... and...it heals naturally!

#### Here's how it was discovered...

The United States space exploration program has had many objectives, like putting a man on the moon... or checking out mars... and looking for life on other planets. But I highly doubt that they ever thought in their wildest dreams that they would find a solution to back pain.

Oddly enough, about 10 years ago, totally by accident... that's exactly what happened.

**How it happened:** NASA scientists made an unexpected observation, over several years. They were surprised to discover that Astronauts who had back pain when they went into space – returned from their mission pain-free! So NASA did what they are good at... they investigated this marvelous new discovery.

**NASA's findings:** They realized that when the Astronauts went into outer space – they did not have the force of gravity to deal with on their spine. This was very important since the pressure of a bulging spinal disc on a nerve causes back pain.

Well, it turns out that the anti-gravity state actually decompresses the disc, taking the pressure off the nerve... relieving pain.

And, NASA discovered that because the discs got decompressed, like a dry sponge sucking up water...the Astronauts were literally taller when they returned from flight!

### **How?**

Picture your spine like a stack of 24 blocks...with a cushioning DISC between each of them.

The discs are sort of like a jelly doughnut.

Each disc has a strong outer “doughnut” part called the *annulus fibrosis*. In the middle is the jelly part, called the *nucleus pulposis*.

If one of these discs weakens or tears, the “jelly” stuff in the middle can leak out of the “doughnut.”

That's what we call a herniated disc.

A second type of disc problem is called a bulging disc.

In this case, the disc BULGES out, without the jelly leaking out, or herniating. It's sort of like squeezing a balloon without bursting it.

A bulging or herniated disc is a major cause of back pain.

To make matters worse, the compressed disc that has been squeezed out of its normal space can put pressure on the delicate nerves that branch off your spinal cord and exit out through the openings in your spine.

### **This Causes Pain to Radiate Down Your Leg...Or...Numbness and Tingling Into Your Foot!**

Pain down the back of your thigh is called sciatica.

Now let's get back to the NASA story...

Since the astronauts rocket through space in a weightless state, they don't suffer the effect of gravity... which takes away the pressure on their spine and discs.

What's even more important – and this is the critical fact – it appears that a reverse or negative pressure is produced.

### **And It's Been Proven That This Negative Pressure Actually Draws The Herniated "Jelly" Back Into The Disc...And It Can Heal Naturally!**

Essentially, negative pressure sucks the disc back to its normal place. And if the disc goes back to where it's supposed to be and the tissues heal, the pinching of the nerves stops... and the pain goes away!

In other words, when THE DISC GETS BETTER, it gets rid of the actual cause of your pain and other symptoms. I'm sure you'll agree that's a lot better than merely covering up the pain with drugs or cutting out the bad part of the disc with back surgery.

I mentioned that the astronauts got taller. That's because the discs went back to their proper place and sucked back fluids. This makes them more "plump and juicy" between the vertebrae. This explains why we lose height with age: many of your discs shrink, just like squeezing water out of a sponge.

### **Houston – We've Got A Problem...**

This is all interesting, but what good is this remarkable back pain solution to you here on earth? *You'd have to become an astronaut and travel in outer space to treat your back pain!!!*

Up until now, that would be true...

### **Breakthrough Medical Technology Reproduces The "Anti-Gravity" Effect On Back and Neck Pain...Down Here On Earth!**

DRX9000C™ computerize technology gets people out of pain, even if you've suffered for years – or even decades. It even works on degenerative discs (dried out and arthritic). People everywhere are able to do activities they haven't done in years... without pain... thanks to NON-SURGICAL spinal decompression.

Sad but true: Back surgery has had a terrible track record. The facts don't lie. And the risks are high. Surgeons warn patients prior to surgery that it's possible your pain could get WORSE. Another possible side effect of surgery is PARALYSIS and – DEATH. Why would you even consider surgery when...

In clinical trials of the DRX9000C™, non-surgical spinal decompression was shown to provide good or excellent relief in 86% of patients with herniated discs and degenerative joint disease – without side effects (*American Journal of Pain Management, Orthopedic Technological Review, November/December 2003; Volume 5*)

Beats surgery's 1%... doesn't it?

And the most incredible thing is...

A 1998 study published in the *Journal of Neuroimaging* showed a 90% reduction in intervertebral disc herniations in 71.4% of patients!

Why is that so incredible?

Herniated discs were thought to be just about untreatable without surgery before the introduction of this awesome new technology.

Even better, treatment with this space-age non-surgical technology is *painless, drugless and there are no documented side effects*. It's actually so relaxing, that many patients fall asleep during treatment.

And best of all...Results are much better.

So... that means...

**You Have A 86% Chance Of Being Able To Get Better...  
With Your Bulging, Herniated or Degenerative Discs  
Actually Healing...Without Surgery!**

Keep in mind that this, until now, has been unheard of with herniated disc cases!

The DRX9000C™ technology is truly *revolutionary*.

Many modern doctors feel there is no better back pain treatment available and it will make spinal surgery (and other back pain treatments) way less necessary!

It's been proven to be effective on patients who had already had surgery, but were still in pain, or worse. It seems that for many back pain sufferers, they never needed surgery in the first place.

Through the combination of proven scientific principles, the latest technological developments and the ingenious work of a specialized team of physicians and medical engineers – **Axiom Worldwide**, a medical manufacturing company, now offers this space age technology in its incredible computerized DRX9000C™ spinal decompression equipment.

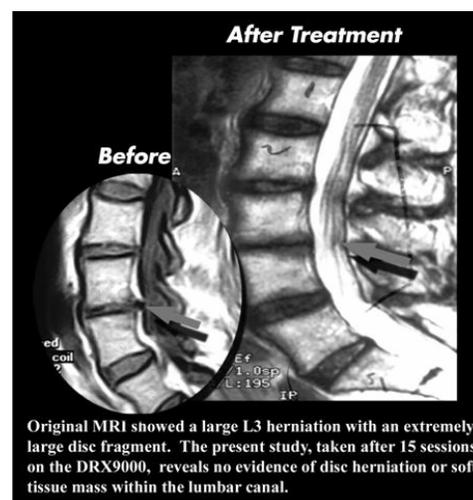

The DRX9000C™ has been proven to relieve pain by enlarging the disc space, reducing herniations, strengthening outer ligaments to help move the herniated material back into place, and reversing the high pressures on the discs using *Negative Pressure*.

In other words...

**The DRX9000C™ Gets You Out of Pain Fast!**

The scientists from NASA and Axiom Worldwide are brilliant. They figured out an amazing way to do what surgeons CAN'T do – actually get a herniated disc to heal!

Basically what happened is that NASA accidentally discovered that during space travel, the anti-gravity state relieved astronauts back pain. The same effect has been “cloned” down on earth with the medical technology of the DRX9000C™ non-surgical decompression machine.

The DRX9000C™ has passed the tests of medical journal peer reviewed and FDA approval with “flying colors” and then some, with its 86% success rate.

**Of special importance:** The DRX9000C™ has been highly effective with some of the most severe cases... even when NO other treatment has helped.

*Even cases of failed back surgery...*

## **What Do DRX9000™ Treatments Feel Like?**

Basically, you lie face up and the amazing DRX9000C™ computer simulates an anti-gravity effect on your back that helps herniated material return to its normal position and stops the pain. Patients are amazed at how easy treatment is to have done.

They describe the treatment as a gentle, painless, intermittent pulling of your back. And like I said before, it can be so relaxing, many patients actually fall asleep during treatment. This is NOT traction. You're not being put on the “rack” and you don't have to hold on to anything with your hands!

## **How Is The DRX9000C™ Different From Traction Devices?**

Spinal traction is as “old as the hills”. Its results with back pain have been *minimal at best*. The big problem with traction is it pulls both the muscles and the spine.

The DRX9000C™ applies specific forces to decrease intradiscal pressure and enhance fluid exchange *within* the disc. This expands the space between the bones and restores nutrients and blood flow to the disc – which causes healing.

MRI studies comparing regular “old” traction to spinal decompression have shown regular traction does NOT return herniated material back into the disc, while spinal decompression does!

Patients also say the DRX9000C™ is extremely comfortable... even relaxing... while traction can be very uncomfortable.

## **How Long Are Treatments and How Many Do You Need?**

Patients typically undergo 20 treatments sessions. Each treatment lasts about 30 minutes on the DRX9000C™ and then you'll relax with something to drink, in an adjustable “easy chair” – with a cold pack and/or electrical stimulation, to enhance the healing process.

You should know that many patients notice significant relief after just a few treatments, and in some cases right after the first! The best part of all, you'll be relieved to know, is that this isn't something you have to do for the rest of your life. So there's no big commitment necessary.

This patented DRX9000C™ spinal decompression technology, and this type of procedure, is the *only* FDA-approved procedure of its kind. I believe that patient selection and the actual treatment itself ought to only be done by an extremely professional and “seasoned” doctor like myself, who is dedicated providing the best to non-surgical treatments for neck and back pain.

And the best part of all is... you don't need daily pain pills or long-term back treatments to live your life pain-free after having this non-surgical procedure performed on your spinal discs!

## **Just Read What One Athlete Had To Say About DRX9000C™ Spinal Decompression**

I was especially impressed by an interview he saw with PGA golfer and top television analyst, Frank Nobile. For 23 years Frank Nobile was one of the top golfers in the world. That all changed when serious back pain made it just too painful to play. His pain from degenerative discs was so severe; it almost put him in a wheelchair. He could barely move!

According to Frank, his last 3 vertebrae – L3, L4 and L5 were nearly “bone on bone” with the discs in serious shape. So Frank reached out to the top specialists in the country – including the famous Mayo Clinic. Eventually, his research led him to the DRX9000C™ – the treatments that would take the pressure off the nerves in his spine and allow his disc to heal.

In a recent interview, Frank Nobile said, “When I have an MRI, it shows discs again... it’s like a modern miracle!” And while at the moment Frank is not yet playing competitive golf, he can play with his daughter, his pets... play tennis... and yes – play golf without pain and have a normal life again.

Everyday, he sees more professional golfers turning to the DRX9000C™. Frank says, “I can’t put a value on it... all the things I’d thought I’d forgotten – I can do again!” He got his “life” back thanks to the DRX9000C™. He’s even feeling like when he turns 50, he’ll be able to play competitive golf on the PGA Senior tour!

### **Warning: Don’t Be Fooled By Knock Offs...**

Watch out for advertising which attempts to mislead you or uses “bait and switch” tactics. You know the type of advertising I’m talking about. It might say something to make you think you were getting something for free, only to have hidden charges once you got there. Some advertisements give you the impression that treatment is going to cost one thing, but when you arrive, you are told “your condition falls into a more costly category”... AND... “there is another procedure *you* need”... AND... “there is another charge for this and that.” Add all those “and’s” together and your treatment now totals way more than advertised!

Oh, and let’s not forget, they often wait until you’re there (like a sitting duck) before they tell you there’s a non-refundable fee due and payable... right now.

You’ll also find out well into the process the doctor doing your pre-treatment exam and all of your post-treatment exams is NOT the treating doctor in charge of the case.

Matter of fact, it may not even *be* a doctor! I believe these types of practices are an embarrassment to the practice of medicine. And although they are not technically illegal, in his opinion, they are unethical and immoral.

One of my mottos is...

***“I Don’t Perform DRX9000C™ Spinal Decompression To Sell You More...  
I Perform DRX9000C™ To SERVE You More!”***

You can be assured I’m in my office to make a huge difference in people’s lives. I’m doing the same thing I’ve been doing since I started practice medicine...helping sick people get well!

And I’m doing the same thing I plan on continuing to do, for many years to come... but now...with even better technology... technology that does what no drug or surgery could ever do!

With the DRX9000C™, I'm getting back pain and sciatica sufferers their lives back, without the pain, risk, hassle and high cost of surgery... without the need for endless, ongoing treatment or daily pain medication.

I don't want to just do your spinal decompression treatment and then never see you again. I want you to become a patient, a part of my practice family. I want your spouse, your family and friends to also be my patients if they have back problem or health concern.

You can be sure my motivation is to do whatever it takes to get your bulging, herniated or degenerated discs back to where they are better than ever before... because... I will see you all of the time. I may see you in town, in the store, or maybe in the same museum or park.

## **Introducing My Spine & Joint Pain Relief Program Featuring the DRX9000C™ Non-Surgical Spinal Decompression System**

Developed specifically for chronic pain sufferers including those with back and neck pain caused by a herniated, bulging or degenerative disc, the success of my program lies in the multi-directional approach to first closing the "gates of pain" if you will, then keeping them closed with lifestyle changes, diet and exercise!

You see, in addition to pain control, the goals of this unique pain relief program is to help increase your physical activity, eliminate the use of addictive medications, and teach you dietary and lifestyle behaviors that work towards getting and keeping you pain free!

This is why my diagnostic and treatment program using the DRX9000C™ beats popping pills hands down!

And the cost of this program, is one-tenth as much as the average spinal surgery... a surgery which boasts a whopping 1% success rate!

My Spine & Joint Pain Relief Program includes:

- ✓ *The DRX9000C™ Qualification Evaluation*
- ✓ *"Living Pain Free" Comprehensive Consultation and Examination*
- ✓ *DRX9000C™ Spinal Decompression Treatments and Fast Acting, Pain Relief Modalities*
- ✓ *Follow Up Consultations*
- ✓ *Discharge Consultation including back pain prevention recommendations such as lifestyle modifications and exercise instructions*

Remember, research has proven DRX9000C™ 86% effective! With those kinds of odds, you've got nothing to lose... except your pain.

For information on how my spine and joint pain relief program works, or if you have any questions regarding insurance, just contact my office for more details.

My staff will gladly assist you in verifying if this program and the DRX9000C™ will be covered by your insurance...and, for those who need financial assistance, I work with a marvelous financial institution, which enables patients to cover any costs interest-free for up to 12 months!

By the way, I personally conduct all of the exams. And if you have to travel some distance (patients travel for DRX9000C™ treatment with me, from surrounding cities), I can assure you, it's well worth the trip.

Also, realize that the average treatment program requires no more than 20 sessions and it's done.

It's not an ongoing process, like many physical therapy or treatment programs. I can perform your treatment in as little as 5 weeks. If everything looks good (as it almost always does), I may recommend minor follow-up... but not until 6 months later.

### **What To Do Now...**

Your next step is to schedule a free *Qualification Evaluation & Spinal Motion Analysis* (\$250 value) to see if you are a candidate for the DRX9000C™.

If, after the appointment, you believe there is no benefit to working with me, you simply leave and that's it. No hard feelings...

However, if you do decide to take the next step, I will perform a complete spine and joint examination and discuss with you my treatment plan and how we can proceed from there.

So even if as you read this informative report you are unsure about having the procedure right away, go ahead and schedule your no-obligation, qualification evaluation & spinal motion analysis immediately.

Don't wait until you've got so much back pain or sciatica that you can't even move. Pick up the phone now and call my office at **556-0200**. Let them know you received my special report on the DRX9000C™ and would like to schedule your complimentary qualification evaluation. My staff will then schedule a time for you to come in.

Appointments are done on time. No nonsense. Unlike many doctors' offices, there is never overbooking of my schedule.

Now when you speak to my staff, understand that they are not doctors and can't answer any questions about your condition – that's what your FREE qualification evaluation is for.

You're welcome to tour the DRX9000C™ center and take a look around. We will spend as much time as you need to answer your questions.

You'll tell me about what you've been through – the good, the bad, and the ugly involving your back! And I'll do something you may NOT be accustomed to when visiting a doctor... I'll listen.

That's right!

I'll get to know you and get an understanding of how your pain has affected your life. And of course, examine your back. You'll be amazed how I'll explain everything to you, in "plain English," without any medical mumbo jumbo

Once I have thoroughly gone over your case history, your motion analysis and examination findings, I'll decide if I should accept your case.

Oh yes, a word about that...

Because I am one of the area's ONLY medical physicians with the DRX9000C™, I am physically able to take on only a very small number of new patients each month.

You see, DRX9000C™ appointments must be reserved 45 minutes apart for each patient on the machine.

That means I can only treat a few people each day. Believe it or not, I actually turn away way more people than I accept!

You read it right...

I only treat people who are truly serious about getting better. And I **ONLY** treat people who are highly likely to get better... I'm **NOT** one of these doctors who treat anyone who walks in the door with a pulse and an insurance card!

And that means to become a patient; you must go through my qualification/screening process.

So, if you're interested in taking me up on my offer and would like to explore your treatment options, pick up the phone now and call my office at **556-0200**. What have you got to lose?

Either way, I wish you good luck and good health!

Thank you again for taking the time to educate yourself about this amazing and wonderful procedure.

It can really change your life.

Sincerely,

*Robert L. Patterson, DO FACEP*

P.S. Picture how your life will be in a few weeks if you decide to do something about your agonizing back pain *right now*! How many days of misery will it save you? Will you do a better job at work?

Unfortunately we'll never know unless you take the next step. Call today for your **FREE DRX9000C™ Qualification Evaluation!** Again, the phone number to call is **556-0200**.

P.P.S. I highly recommend you visit my comprehensive website. It does a great job explaining all about the DRX9000C™ procedure in advance for you. Check it out at: **[www.covenantclinics.com](http://www.covenantclinics.com)**.

*The information provided in this report is meant as a general source of information only and should not be substituted for sound medical advice. If you are considering one of these procedures, you should consult further with a medical professional for complete information on the benefits and risks of all treatments described in this report.*
